**Subject:** Please Adopt Strong Fracking Rules

Dear Jodie Columbie,

We need stronger fracking rules that:

Please require before-and-after water monitoring around each well that is subject to fracturing operations within a half-mile of a freshwater source. Require full disclosure where and when fracking fluids will be used, what toxic constituents the fracking fluids may contain, and what amounts of chemicals will be used BEFORE and AFTER fracking operations commence. Allow no trade secret exemptions from the requirement to disclose the constituents of fracking fluids prior to or after their use. Provide broad public access to fracking-related information, and not rely solely on the problematic FracFocus website to disseminate fracking fluid information to the public. Provide landowners adequate notice and opportunity to secure their water rights prior to the use of fracking fluids.

Please adopt new fracking rules that protect the people of Alaska's right-to-know exactly what toxic fracking fluids are going to be used around our homes, our salmon streams and our drinking water sources.

These new rules should:

- Require before-and-after water monitoring around each well that is subject to fracturing operations within a half-mile of a freshwater source.
- Require full disclosure where and when fracking fluids will be used, what toxic constituents the fracking fluids may contain, and what amounts of chemicals will be used BEFORE and AFTER fracking operations commence.
- Allow no trade secret exemptions from the requirement to disclose the constituents of fracking fluids prior to or after their use.
- Provide broad public access to fracking-related information, and not rely solely on the problematic FracFocus website to disseminate fracking fluid information to the public.
- Provide landowners adequate notice and opportunity to secure their water rights prior to the use of fracking fluids.

Powerful oil and gas interests do not want Alaskans to know what chemicals they are using around our surface and ground waters. It's up to the AOGCC to protect the public interest and ensure the health and safety of Alaskan waters from fracking for generations to come.

It is up to you.

Sincerely,

Sue Christiansen
